

Determine the Size

```
std::vector<std::string> first{"one", "two", "three", "four"};
```

- **Empty?**

```
first.empty();
```

```
first.empty()  $\equiv$  first.size() == 0;
```

- **Numbers of elements?**

```
first.size();
```

- **Maximal size?**

```
first.max_size();
```
