Too Early

Name variations

- `std::has_trivial_copy_assign`
- `std::is_trivially_copy_assignable`
- Should I call it C++0x or C++11

Only Experts

C#+

Damn!

```
std::string testStr = >>Only for Testing Purpose.<<;
```

```
char a = ,a';
```

```
std::string z= std::string(„z“);
```

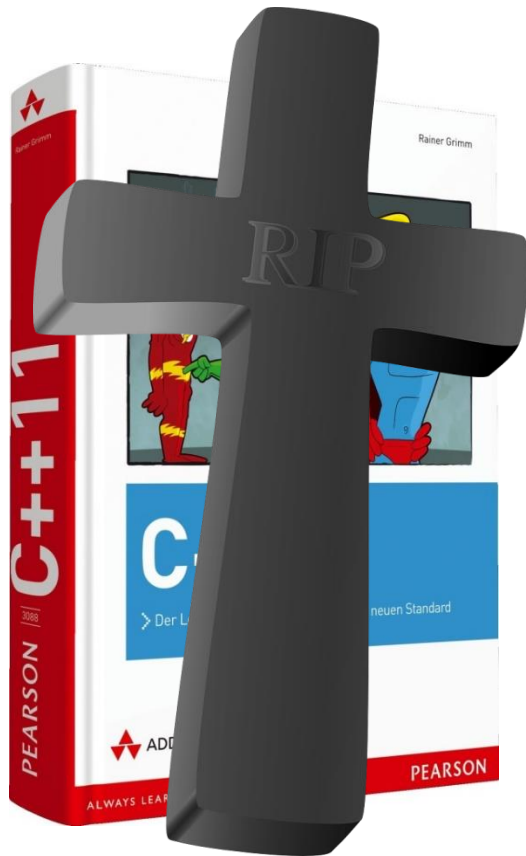

```
For (auto c: testStr) std::cout << c;
```

```
Std::vector<int> vec= {1, 2, 3, 4, 5};
```

```
static_assert(nth_prime(1) == 2, „nth-prime Fehler“);
```

Goodbye Germany

Hello Selfpublishing

Concurrency with Modern C++

What every professional C++ programmer should know about concurrency.

- Write the book in English at Leanpub
- Proofread by experts
- Sell the rights to translate and publish the hardcover book in
 - Korea
 - Germany

Lesson Learned

- The quality of my books increased a lot
- I did my own marketing
- The books sell very well
- I'm the boss
 - I rejected to publish my current book in English

Writing books makes sense from a financial perspective.
